

Intervention Practices Study

We are seeking participants

for an **online OR in-person** focus group discussing the approaches clinicians use when working with bilingual children on the autism spectrum

We are looking for adults who:

- Are the caregiver of a child between the ages of 18 - 72 months who has a presumed or confirmed autism diagnosis
- Have a child who has received autism services in Nova Scotia
- Speak a language other than English (e.g., Arabic, Spanish) at home

The study involves one session that is approximately 1.5 hours long. It requires either coming in-person to Dalhousie University **OR** an internet connection and access to a computer or tablet. To thank you for your participation you will receive a small compensation after the session.

For more information or to see if your child is eligible to participate please send us an email at cliclabb@dal.ca with the subject "Culture Study".
